

CCTV SYSTEMS

Technoflex Rubber Products (An ISO 9001:2015 certified company) is located in Rubber Park, Airapuram, which has been organized for Design and Manufacturing of all type of Rubber, Polyurethane, Plastics Products and Metal Components.

When we believe innovation is the key component to remain as the market leader, we cannot refrain from introducing wide range and variety of Molded Rubber products and the moulds for manufacturing those components.

When we believe innovation is the key component to remain as the market leader, we cannot refrain from introducing wide range and variety of CCTV components.

We provide our customer base with a choice of quality imported products that meet customer Security Requirements. Surveillance plays a huge part in today's society, and with cameras all around us, our day-to-day lives are experiencing higher levels of security each day.

Our products range from CCTV Cameras, Digital Video Recorders, Advanced Digital Video Recorders to Network Video Recorders, Mobile Video Recorders and IP cameras.

VIDEO RECORDERS

Video recording enables the picture feed from the camera to be displayed and recorded for future view. The Video Recorders can be DVRs (Digital Video Recorders) used to record images to a HDD(Hard Disk Drive), or NVRs (Network Digital Video Recorders) which record video in a digital format to a mass storage device.

4Ch DVR Entry

8Ch DVR Entry

16Ch DVR Entry

TYPES OF CAMERAS

We are using different types of cameras like Bullet cameras, Dome cameras, Box cameras and many more. Type of Lenses used is depends on the Picture Quality.

Bullet

Dome

Veri-Focal Bullet

Veri-Focal Dome

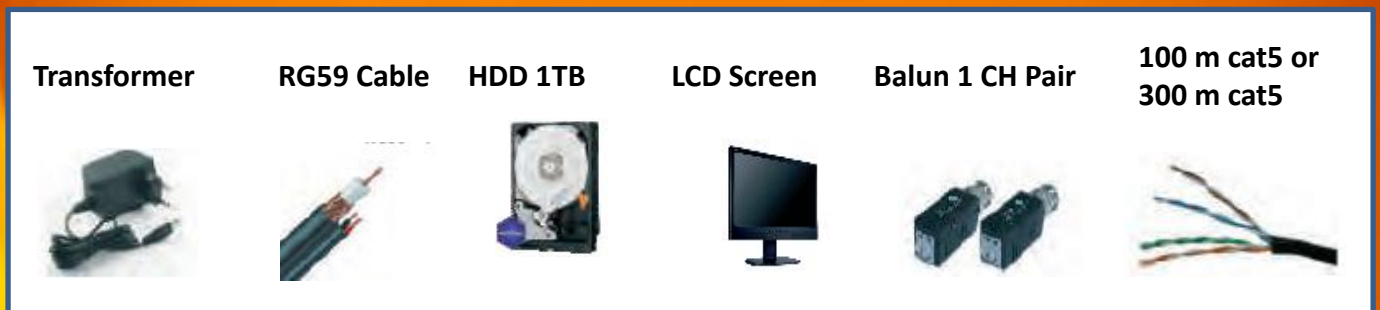

Box

ACCESSORIES

- ❖ Video signals are transmitted from the camera to the DVR via RG59 or Cat5 cable.
- ❖ Any CCTV installation will require various connectors, adapters and tools. Connectors are components used to conduct and transfer signals from one cable or device to another.
- ❖ A hard disk drive (HDD) is a data storage device used for storing and retrieving digital information. The LCD monitor displays the picture feed from the DVR or NVR .The larger the screen the easier it is to view the picture.

- ❖ A 2.5amp transformer can supply power to 12v CCTV devices using 220V, offering the convenience of a 'plug and play' power solution.
- ❖ A 10amp 9-Way PSU is used to distribute 12vDC power to multiple devices at once which offers a central power supply point for a single basic application.

CCTV Industrial Systems

These systems generally consist of a variety of cameras which would Monitor an area, Detect an object, Recognise the type of object or clearly Identify a person. This will directly influence the lense size and quality of resolution required.

IP CCTV

IP provides an easy solution by utilising local area networks (LAN) to link IP cameras. IP CCTV provides high quality mega pixel images that are encoded into digital signals (binary) which are then compatible with most digitally based devices such as PCs, servers and routers.

Applications

These are mainly used in Airports , Retail outlets, Banks, Factories, Events, Residential Areas, Offices and Traffic.

Since your choice of CCTV system impacts on the quality of your security. We offer the expertise and CCTV range of cameras to custom build your system and achieve your dedicated requirement.
